AI Factory

UnifyCloud™

Deploy AI POCs in 5 Hours or Less with UnifyCloud

Unlock the full potential of Artificial Intelligence with UnifyCloud's AI Factory program, powered by CloudAtlas. Designed for seamless integration with Azure, AI Factory agentifies the enterprise, empowering customers to innovate rapidly, ensure ethical and secure AI deployment, and maintain cost efficiency across all AI workloads. AI Factory is used to quickly identify a specific use case to deploy a proof of concept (POC) in the customer environment in just hours to test and validate benefits before proceeding to full pilot and developing a full production AI application in a matter of weeks.

Quickly Realize the Power of AI with AI Factory

AI Workshop

Accelerate AI with 200+ Deployable Use Cases

Select from dozens of industries and solution areas to best meet organizational AI objectives. Use cases can include agentic and multi agent AI, Copilot agents, Fabric and more to set you up for AI success.

### AI Proof of Concept

Deploy in 5 Hours or Less

Everything you need to move a use case to POC in as little as two hours to begin testing and validating business benefits. Deploy multiple POCs simultaneously to test several AI workloads.

AI Pilot Deployment

Seamlessly Move POCs to Pilot & Production

Guided deployment includes use case details, checklists, Azure resources, architecture and Bicep scripts, and even an automated deployment agent – everything needed to confidently move a POC to pilot and production in just days or weeks.

- **Accelerate AI adoption**
- **Maximize value and time-to-cloud**
- **Unlock new revenue streams**
- **Seamless path to production**

AI Factory helps businesses discover the potential of AI to improve processes and innovation. Customers may be eligible for **Microsoft funding** to support some or all phases of their AI journey.
