

App and Database Modernization is More Accessible and Easier Than Ever with CloudAtlas

Many organizations choose an IaaS cloud migration approach because transformation to PaaS and Containers seems too complex, time consuming, and expensive due to the effort required. CloudAtlas uses static-code analysis to scan code in minutes, provide code-block and line-of-code changes required and takes it a step further with **automated remediation** of app code and database schema to simplify and **speed digital transformation by up to 80%**!

How UnifyCloud Helps

UnifyCloud's CloudAtlas is a state-of-the-art end-to-end cloud transformation platform that empowers organizations to navigate the challenges of PaaS and Container transformation quickly, efficiently and confidently. Leveraging advanced artificial intelligence and machine learning algorithms, CloudAtlas automates transformation analysis, guidance and actual code and schema remediation to accelerate the process and speed migration to the cloud, providing customers and partners with a reliable and effective solution.

Scan millions of lines of code in just minutes, saving valuable time, resources and expense

Get guidance at a level of detail virtually impossible if done manually

Identify cloud readiness, tasks, estimated effort, and costs for remediation and modernization

Remediation insights include category, datapoint, reason, block, and line number, file path, effort, & replacement code

Reduce effort by as much as 80% with CloudAtlas automated app code and database schema remediation

View existing and updated code, approve and compile modernized code to migrate with confidence using CloudAtlas

Up To 80% Less Remediation Effort with CloudAtlas!

Key Benefits and Capabilities

CloudAtlas app code and database schema automated remediation enables organizations to deliver true transformation, accelerate timelines, streamline operations and minimize downtime so that they can focus on strategic initiatives to drive business growth and success.

Simplified Transformation

Minimize manual effort, making PaaS transformation easily achievable

Accelerated Time to Market

Reduce time required to migrate applications to PaaS environments to gain a competitive advantage

Enhanced Scalability

Ensure that migrated applications and databases can efficiently handle varying workloads

Reinvent with Artificial Intelligence

Modernize apps to leverage AI, integrate AI into existing apps, or build new born-in-AI™ apps

Consistent and Reliable

Identify issues before they impact operations, avoid human error which leads to delays and downtime

Enhanced FinOps, Security and Compliance

Minimize costs and service disruption, address vulnerabilities, strengthen security and reduce risk

UnifyCloud is a Cloud Partner You Can Trust

UnifyCloud™

End-to-End Cloud and AI Transformation Platform

UnifyCloud is a global information technology and cloud solutions provider specializing in simplifying and accelerating cloud and AI transformation and managing security, compliance, and cost in the cloud. A ten-time Microsoft Partner of the Year honoree, UnifyCloud's award-winning CloudAtlas platform makes the journey to Azure fast, smooth, and efficient.
