PaaS Transformation is More Accessible and Easier Than Ever with CloudAtlas

Many organizations choose an IaaS cloud migration approach because PaaS transformation seems too complex and expensive due to the effort required to identify and implement necessary code and schema changes. CloudAtlas uses static-code analysis to scan code in minutes, provide code-block and line-of-code changes required and even automates remediation of app code and database schema to simplify and speed PaaS transformation.

How CloudAtlas Helps

CloudAtlas is a state-of-the-art end-to-end cloud transformation platform that empowers organizations to navigate the challenges of PaaS transformation quickly, efficiently and confidently. Leveraging advanced artificial intelligence and machine learning algorithms, CloudAtlas automates transformation analysis and guidance and the actual code and schema remediation to accelerate process and speed migration to the cloud, providing partners with a reliable and effective solution.

Scan millions of lines of code in just minutes, saving valuable time, resources and expense

Get guidance at a level of detail virtually impossible if done manually

Identify cloud readiness, tasks, estimated effort, and costs for remediation and modernization

Remediation insights include category, datapoint, reason, block, and line number, file path, effort, replacement code

Reduce effort as much as 80% with CloudAtlas automated app code and database schema remediation

View existing and updated code, approve and compile modernized code to migrate with confidence using CloudAtlas

Up To 80% Less Remediation Effort with CloudAtlas!

Key Benefits and Capabilities

CloudAtlas app code and database schema automated remediation enables organizations to deliver true transformation, accelerate timelines, streamline operations and minimize downtime so that they can focus on strategic initiatives to drive business growth and success.

Simplified Transformation

Minimize manual effort, making PaaS transformation as easy as IaaS

Accelerated Time to Market

Reduce time required to migrate applications to PaaS environments to gain a competitive advantage

Enhanced Scalability

Ensure that migrated applications and databases can efficiently handle varying workloads

Proactive Issue Resolution

Identify and address issues before they impact operations

Consistent and Reliable

Avoid human error and inconsistencies which leads to delays and downtime

Enhanced FinOps, Security and Compliance

Minimize costs and service disruption, address vulnerabilities, strengthen security and reduce risk
