

Optimize and Innovate Cloud Costs, Security and GRC

CloudAtlas uses infrastructure data to deliver analytical reporting to help monitor key aspects of on-premises and cloud applications, databases and workloads. It provides a holistic view of cloud environments to guide monitoring and management of costs/finops, cybersecurity, and governance, risk and compliance (GRC) with numerous controls and dashboards that provide utilization and cost insights and guidance. Use this information to streamline, maintain and innovate your cloud IT landscape.

Key Benefits and Capabilities

Migrating to the cloud is not “once and done” – it is an ongoing process. CloudAtlas simplifies and facilitates monitoring applications, databases and workloads after they are migrated to the cloud to provide visibility for optimizing the underlying cloud services and continuing cloud innovation.

Awareness of Service Use

Insight into services usage and value to optimize costs, security and compliance of the environment

Security Alerts

Track issues based on severity with security recommendations to manage and minimize risk

Avoid Paying Costly Overages

Get recommendations to maximize utilization and minimize cost based on current environment and usage

Around the Clock Monitoring

Daily reporting on services, usage, and evolving standards to manage and innovate environments

Compliance Management

Monitor cloud infrastructure support and compliance to ensure standards are met (GDPR, HIPAA, PCI, etc.)

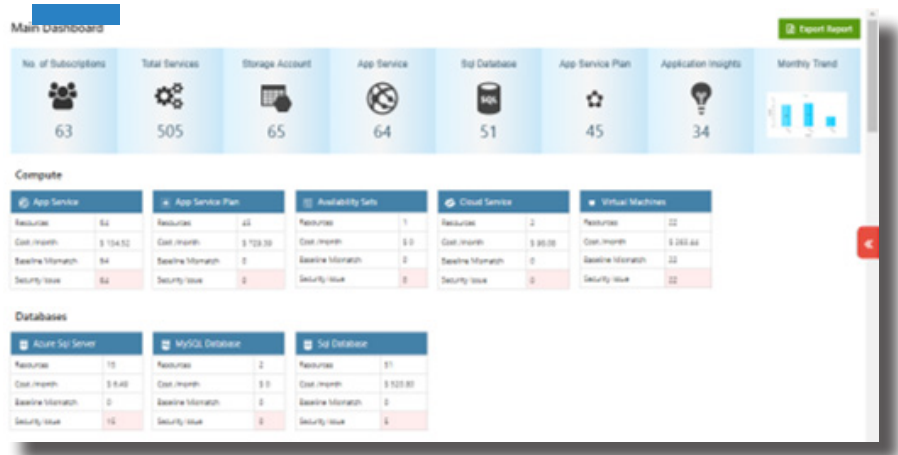

Cloud Infrastructure Management

Manage cloud infrastructure governance and controls to ensure enterprise requirements are met

Manage Cloud Environments with Ease

With CloudAtlas you get the necessary tools to manage an entire cloud infrastructure effectively, including costs, compliance and security via holistic dashboards and detailed data drill downs.

The CloudAtlas Optimize and Innovate Journey

Step 1

Register with appropriate directory services to access infrastructure data

Step 2

CloudAtlas reads subscriptions, services and usage data

Step 3

Ongoing monitoring of subscriptions for cost and security issues

Step 4

Generate cost, compliance and security recommendations

Step 5

Continuously optimize and innovate cloud subscriptions

UnifyCloud is a Cloud Partner You Can Trust
